

2546 siabite jj

A high-performance abrasive specially designed for high-alloy steel

2546 siabite jj

Product profile

Grit type:	Ceramic aluminium oxide
Grit range:	60-320; 400
Backing:	jj-wt cloth
Coating:	Closed
bonding:	Resin over resin
Special coating:	Cooling additive

A high-performance abrasive specially designed for high-alloy steel

Specially designed for high-alloy steel and other hard to grind metals, 2546 siabite jj consistently delivers maximum performance in applications from material removal to final sanding – thanks, among other things, to its high adaptability to contours, curves and profiles.

Advantages

- High removal rate thanks to ceramic grit
- Active additives with a cooling effect greatly reduce discolouration
- Highly adaptable to contours, curves and profiles
- High performance on hard to grind materials

Abrasive formats

Cloth rolls; jumbolino; siafast discs; Wide belts (width: from 400 mm); Hand sanding belts and sleeves (width: 30-390 mm/length: up to 950 mm); Narrow, edge and long belts (width: 25-399 mm/length: up to 8500 mm); Tongued sanding belts (width: 6-30 mm/length: up to 950 mm)

Use

Contact belt sanding

Power file

Slack-of-belt sanding

Stroke belt sanding

Applications

- Removing discolouration
- Sanding down
- Surface treatment
- Deburring
- Blending
- Structuring and final sanding

Materials

High-alloy steel

Technology

- siafast
