

2970 siasphere

the high-tech solution for a perfect finish

2970 siasphere

Product profile

Grit type:	Aluminium oxide
Grit range:	400; 800-1500; 2500; 4000
Backing:	jj-wt cloth
Coating:	structured
bonding:	Resin over resin
Special coating:	Cooling additive

the high-tech solution for a perfect finish

The special siasphere series allows metal surfaces to be treated more efficiently and cost-effectively. 2970 siasphere is the more flexible of the two series. It is designed for shaped surfaces and radii and is ideal for producing a perfect finish thanks to its wider grit range.

Advantages

- Long product life
- High stock removal rates with less pressure
- Fewer belt changes
- Shorter finishing time
- Excellent and consistent finish over a long period of time
- Fewer individual operations

Abrasive formats

Narrow, edge and long belts (width: 25-399 mm/length: up to 8500 mm)

Use

Contact belt sanding

Power file

Stroke belt sanding

Centreless belt sanding

Applications

- Surface treatment
- Structuring and final sanding
- Sanding down
- Removing discolouration

Materials

High-alloy steel; Other hard-to-grind metals; Unalloyed / low-alloy steel; Non-ferrous metal

Technology

- siasphere
