

2601 sianor j

high flexibility and edge stability for fine quality surface finishes in manual sanding applications

2601 sianor j

Product profile

Grit type:	Emery
Grit range:	410
Backing:	j-wt cloth
Coating:	elutriated
bonding:	Hide glue

high flexibility and edge stability for fine quality surface finishes in manual sanding applications

Whether it's non-ferrous metal or high-alloy steel – the sianor 2601 manual sanding series allows structuring and final sanding to a perfect scratch-free finish in next to no time. Also highly impressive: the fine polishing action.

Advantages

- Flexible but with stable edges
- Perfect surfaces, no random scratches
- Can be torn to any desired format
- Fine polishing action

Abrasive formats

Cloth rolls; jumbolino; economy rolls; Standard curves; Various strips; Hand sanding belts and sleeves (width: 30-390 mm/length: up to 950 mm); Narrow, edge and long belts (width: 25-399 mm/length: up to 8500 mm); Tongued sanding belts (width: 6-30 mm/length: up to 950 mm); plastic coil

Applications

- Removing discolouration
- Structuring and final sanding
- Finishing of watch cases and bracelets

Materials

Unalloyed / low-alloy steel; High-alloy steel; Non-ferrous metal

Use

Manual sanding
