

4515 siabite

the ceramic fibre disc for heavy-duty applications

4515 siabite

Product profile

Grit type:	Ceramic aluminium oxide
Grit range:	36; 50-120
Backing:	Fibre
Coating:	Closed
bonding:	Resin over resin
Special coating:	Cooling additive

the ceramic fibre disc for heavy-duty applications

4515 siabite is designed especially for heavy-duty sanding applications. The highly aggressive and durable ceramic fibre disc is suitable, in particular, for materials such as stainless steel (INOX), exotic alloys and other hard to grind metals.

Advantages

- High-performance product with ceramic aluminium oxide
- Active additives with a cooling effect greatly reduce discolouration
- Firm fibre backing

Applications

- Weld preparation
- Removing discolouration
- Sanding down
- Surface treatment
- Blending
- Deburring

Abrasive formats

Fibre discs

Materials

High-alloy steel; Other hard-to-grind metals

Use

Angle grinder
