

# 5330 microtec

perfect finish for ceramic / fibreglass finishing

## 5330 microtec

### Product profile

Grit type:	Silicon dioxide
Grit range in $\mu\text{m}$ :	0,01
Backing:	Polyester foil
Coating:	elutriated
bonding:	Resin over resin

### perfect finish for ceramic / fibreglass finishing

The elutriated 5330 microtec series for ceramic /fibreglass finishing provides the ideal basis for perfect and cost-effective polishing in ferrule production.

### Advantages

- Outstanding polishing properties during finishing
- Grit is calibrated very precisely for fine surface finish

### Abrasive formats

Various discs

### Applications

- Finishing of ceramic/fibreglass terminations (fibre optics)

### Materials

Fibreglass

### Use

Manual sanding

Fibre optic polisher

Stationary disc sanding
