

# 5900 microtec

the professional abrasive for higher cutting power

## 5900 microtec

### Product profile

Grit type:	Aluminium oxide
Grit range in $\mu\text{m}$ :	9; 15-40; 50-80
Backing:	Polyester foil
Coating:	Electrostatic
bonding:	Resin over resin

### the professional abrasive for higher cutting power

The coated 5900 microtec series: The aluminium oxide finishing product with polyester backing and resin over resin bonding is ideal for applications that demand higher cutting power.

### Advantages

- For clearly defined standard scratch depth values
- Maximum durability
- Even cross sanding
- High-gloss polished surface finish
- May be used wet or dry, resistant to coolant
- Grit is calibrated very precisely for fine surface finish

### Abrasive formats

film rolls; Jumbo rolls; Standard curves; Self-adhesive strips; emery sticks

### Use

Belt finisher

Manual sanding

### Applications

- Finishing of copper rollers; finishing of chrome/hard chrome rollers; finishing of zinc rollers
- Finishing of steering assembly parts; finishing of shock absorber parts; finishing of valves; finishing of hydraulic components; finishing of pneumatic components; finishing of ball bearings

### Materials

High-alloy steel; Unalloyed / low-alloy steel; Non-ferrous metal; Other hard-to-grind metals
