## siafleece – the best start to a better finish

blue line

### **Nonwoven Abrasives**

### siafleece

Nonwoven abrasive products incorporate high quality fibres with flexible resin technology. Combined with a high mineral grain content, the siafleece range has the flexibility and conformability to produce a consistent finish on any work piece.

Suitable for hand and low speed/low pressure applications, siafleece offers quality micro scratch finishes especially on metal, but also on plastic coatings and composites, with a consistent, controlled cutting action.

### **Combined solutions**

Nonwoven abrasives have been developed to be used in combination with coated abrasives by sia Abrasives.

### Advantages

- Improved flexibility for hard to reach areas
- Consistent scratch pattern due to improved grain consistency
- Increased lifetime as a result of the grain distribution through the fleece
- For manual or machine use
- Improved tear resistance
- No clogging

### Structure

Aluminium oxide / Silicon carbide Synthetic resin coarse medium very fine

# **Application recommendation**
